FISH STOCKING – 2011 **Minden/Haliburton**

Our annual fish-stocking program this year resulted in a total of 71,550 fish being placed in local water bodies. The majority were stocked using a specially equipped Ministry helicopter. This gets the job done much faster than road stocking and also allows us to place fish into more suitable habitats within the lakes.

Once again, the Haliburton Highlands Outdoors Association, through their hatchery, raised and stocked 5,050 Lake Trout and 17,150 Rainbow Trout into local lakes. The many dedicated volunteers who were involved in the raising of these fish also assisted the MNR in their distribution, which was greatly appreciated.

One way you can assist us, as an angler, is to provide reliable information on the lakes you fish. The best way to do this is by keeping track of your fishing trips in an Angler's Diary. Please feel free to drop in to our Minden office and pick one up or give us a call at 705-286-1521.

We are always interested in your comments or inquiries about the fish-stocking program.
